

FM-CX2 Broadcast Antenna

1. Overview

The FM-CX2 small transmitting antenna is a dedicated transmitting antenna specially designed for closed environments such as highway tunnels.

Features

- Small size, easy installation, high quality and low price;
- Use fireproof materials, safe and reliable;
- The gain is 2.15dBi, and its coverage is large;
- Good match with the remote transmitter (repeater).

2. Technical Specifications

- Working frequency: 87.5~108MHz
- Power capacity: 25W
- Antenna gain: 2.15dBi
- Impedance: 50Ω
