

## ZHC318-0104D Analog Audio Distributor

### Introduction:

The ZHC318-0104D analog audio distributor is an analog audio balanced input distribution into four analog balanced output device, this device is working as radio and television professional equipment, with input and output dynamic range, excellent audio indicators, small channel gain difference; high channel isolation, power through etc.

### 1. Technical Specifications:

1. Audio Input Level	-30dBu ~ +15dBu
2. Audio Input Impedence	600Ω
3. Audio Output Impedence	600Ω
4. Audio Gain	0dB
5. Channel Isolation	≥ 85dB
6. Stereo Resolution	≥ 85dB
7. Stereo left/right level difference	< 0.1dBu
8. Channel gain difference	< 0.3dBu
9. SNR	≥ 85dB
10. Distortion	≤ 0.07%
11. Power Supply	AC180V~AC260V 47Hz~63Hz

**Note: Above Testing Range is 20Hz~20KHz.**

## 2. Physical Specifications:

1.Rack Standard	1U (19-inch)
2.Operation Temperature	0°C ~ +40°C
3. Relative Humidity	<95%
4. Running Altitude	≤4500m
